Subject: We do not need or want Sites Reservoir
Date: Monday, July 13, 2020 4:26:53 PM

Dear Members of the California Water Commission:

Please do all you can to stop the Sites Reservoir. It would mean excessive diversions from the Sacramento River (especially in dry years) and, possibly, from the Trinity River as well. Moreover, the infrastructure would harm ecosystems and water quality throughout the region, while raising water temperatures that further threaten endangered salmon.

We have many true needs and decreasing amounts of investment monies to repair the wrongs our society has already made. Please do something far more intelligent with our precious financial and natural resources. Thank you.

Sincerely,

Grace M. Marvin
