Hi Joe,

I was skimming the draft white paper on funding conveyance projects as part of the Water Resilience Portfolio, distributed yesterday, and thought what would be helpful in the Cosumnes Subbasin for flood MAR projects would be funding of feasibility studies and CEQA documents over the next couple of years. The tie in with conveyance is the upper watershed reservoirs, Folsom, to the Folsom South Canal. Are you aware of any grant funding that could be pursued in the next year or so for project feasibility and then environmental analysis if a project is feasible? Feasibility analysis could contribute to data collection, which the white paper is supporting on a watershed/regional level.

Anyhow, just a thought....

Feel free to give me a call on my cell number below if you would like to discuss.

Take care
Linda

Hi Joe,

I was listening in for potential managed aquifer recharge projects in the

Cosumnes Subbasin. Unfortunately in that groundwater subbasin the Groundwater Sustainability Agencies (GSAs-Sacramento County is one of 7 GSAs) are not far enough along with potential managed aquifer recharge projects to apply for the screening. Right now the Cosumnes Subbasin GSAs are estimating completing feasibility studies over the next 2-3 years.

So kind of you to ask.

Hope all is well.

Kind Regards,

Linda Dorn | c 916-479-4701 | p 916-874-1085 | dornl@saccounty.net | Environmental Program Manager | Sacramento County Department of Water Resources | 827 7th St. | Sacramento CA | 95814

EXTERNAL EMAIL: If unknown sender, **do not** click links/attachments.

I'm just following up from the project screening question and answer session on April 22. I wasn't sure if Sac County had a project in mind for screening. If you have any questions, please feel free to contact me.
