Subject: Sites Reservoir, Pacheco, and Del Puerto Canyon proposals

I do not support any of the three reservoir proposals - Sites Reservoir, Pacheco, and Del Puerto Canyon.

Pacheco and Del Puerto Canyon are in areas that are subject to damage from a major earthquake.

Sites Reservoir will destroy a beautiful valley for transient water storage that would require expensive pumping to move water to the valley in flood years. I have nothing nice to say about the Sites proposal.

The reality is that we are over allocated the water available in the state and we need to reduce the amount of water that agriculture is consuming. We have added tens of thousands of acres of vineyards in my lifetime. These vineyards require much more water than the cattle that used to graze that land.

The only realistic solution I see is to increase ground storage in the existing aquifers.

Sincerely,

Stacie Sherman
