Re: Cancellation of Electric Vehicle Charging Station Project Phase III Procurement

Dear :

The Department of Water Resources (Department) thanks you for submitting your Design-Build Statement of Qualifications (SOQ) for the Electric Vehicle Charging Stations Project Phase III (Project). The Project will no longer be funded through the Department's State Water Project and the Department is immediately cancelling the Request for Qualifications and any further progress on the procurement for this project.

The Department understands and appreciates the effort that went into the preparation of the SOQs and is sensitive to the impacts that cancelling a procurement can have on its relationship with the contractor community. The Department does not take the decision to cancel a procurement lightly and must make decisions that are in the best interest of the people of California.

California's Department of General Services (DGS) will take over the management, delivery, and funding of the Project. The overall scope of the Project may be distributed over multiple design and construction contracts, and the schedule for the construction of all the facilities will be extended through 2035. The Department encourages you to investigate any opportunities to provide design and construction services through DGS contracts.

If you have any questions, you may contact me directly at Kevan.Samsam@Water.ca.gov, or DWR-CDP@water.ca.gov.

Sincerely,

Kevan Samsam, PE, Manager
Project Delivery Branch
Division of Engineering
