

**NOTICE TO STATE WATER PROJECT CONTRACTORS****Date: March 25, 2025****Number: 25-04****Subject: Increase of State Water Project 2025 Allocation to 40 Percent**

**From:** Original signed by  
**John Yarbrough**  
**Deputy Director, State Water Project**  
**Department of Water Resources**

Since late February, recent atmospheric rivers brought moderate precipitation and colder temperatures across California. These storms contributed to increased runoff and improved statewide snowpack, especially in the northern Sierra where the snowpack is at 114% of the historical average. These conditions, along with a conservative forecast of conditions through the rest of the year, support the Department of Water Resources (DWR) in increasing the State Water Project (SWP) allocation from 35 percent to 40 percent of most State Water Project (SWP) contractors' requested Maximum Annual Table A Amounts for 2025, as shown in Attachment A – 2025 SWP Allocation. DWR may revise the SWP allocation if water supply conditions change.

To determine the available SWP water supplies, DWR considers such factors as SWP contractors' 2025 demands, existing storage in SWP conservation facilities, estimates of future runoff, SWP operational and regulatory requirements from the Federal Endangered Species Act and California Endangered Species Act, and water rights obligations under the State Water Resources Control Board's authority.

To schedule SWP water deliveries under this allocation, DWR will develop the 40 percent water delivery schedules by prorating the 50 percent schedules submitted by the SWP contractors in October 2024 (as part of initial requests) or as revised with any subsequent updates. If an SWP contractor foresees any changes to their water delivery schedule, please communicate such changes to DWR in a timely manner.

If you have any questions or need additional information, please contact me at [John.Yarbrough@water.ca.gov](mailto:John.Yarbrough@water.ca.gov).
