

System Reoperation

What is it?

How does it work?

System Reoperation

- What is it?
- Existing System – Can it do more?
- Could be a single project
- Most likely multiple projects with common connection. (Watershed) (Shared facilities)
- New benefits – integrated system better than the individual parts

System Reoperation

- Example 1 – Shasta Temperature Control Device
- Example 2 – CVP + SWP (Coordinated Operations Agreement)
- Example 3 – CVP + SWP + Cooperating Water Districts with compatible facilities

System Reoperation

- Is re-operation the “silver bullet”.
- Single solution fixes all??? NOT!!
- Cooperation
- Evaluation
- Creativity
- Trust

System Reoperation

- Legislature has acted – SB X2.1
- Department of Water Resources engaged
- Plan of Study has been prepared – on Website
- Potential opportunities identified
- Next Phase ready to launch
- More to come – Details Oct 25

System Reoperation

- California Water Commission has role
 - SB X7.2
 - Independent Decision Making Authority
 - Funding - \$3B
 - Choose Projects
-
- Enviable position – Challenging Responsibility
