

Annual Review of the State Water Project

Background

The California Water Commission is responsible for conducting an annual review of the construction and operation of the State Water Project, and making a report on its findings to the Director of the Department of Water Resources and to the Legislature, with any recommendations it may have (WC §165).

Executive Officer Sue Sims will discuss the process and timeline for completing this project by the end of this calendar year. A draft outline of the report will be discussed including potential critical issues which may be included. Commissioners will have the opportunity to provide direction to staff.
