

Annual Review of the State Water Project

Background

The Commission is responsible for the completion of an annual review of the construction and operation of the State Water Project, and making a report on its findings to the Director of the Department of Water Resources and to the Legislature, with any recommendations it may have (WC §165).

In October 2011, the draft Annual Review was presented to the Commission. Commissioners asked for additional information on prior year SWP water deliveries and proposed construction work. That information has been added in the report. DWR's State Water Project office has reviewed this version of the report.

If approved by the Commission, the Annual Review will be finalized and sent to the Department of Water Resources, the State Legislature, and posted on the Commission's website.
