**Attn: Margaret Cave Baum**

**GEOTECHNICAL EXPLORATION**  
**NOVEMBER 9, 2011**

**Background:** The initial parcel selections were based on utilizing the most current available data, which included aerial photos, previously drilled holes and other pertinent data to assist in the proposed hole location.

Sites were selected with respect to the alignments identified in the Conceptual Engineering Report (CER) and after consultation with the members of the DHCCP team, which included staff from the environmental, real estate, engineering, and geotechnical disciplines. The criteria established by the team was to obtain relevant soil information for preliminary and final design of facilities and permitting requirements (US Army Corps of Engineers, Division of Safety of Dams, etc.), providing consistency with temporary entry permit language and landowner concerns, to implement and follow the Mitigated Negative Declaration language and required permits, and species to minimize overall impacts. A majority of the sites were selected to provide information and data primarily for the intakes, river crossings, Intermediate Forebay, and the Byron Tract Forebay. Additional sites were selected for the Pipeline/Tunnel Option.

After the Superior Court issued Order, DWR filed a renewal motion requesting two entry days to conduct surveys solely for the purpose of hole placement. Most of the landowners opposed this motion. The Superior Court declined to rule on the motion on the grounds that the matter was stayed pending DWR's appeal of the Order.

5. In accordance with Section 1263.025 of the California Code of Civil Procedure you are entitled to seek a second opinion on the value of your property and to receive reimbursement of up to \$5,000 to pay for reasonable appraisal costs. ## Areas of Main Concern to Owner and DWR's Response

Owner opposed to project and has not provided any design modifications for DWR to consider. **No specific concerns identified in relation to the location of the proposed drill site.**

## Why Necessary to Initiate Eminent Domain Action

DWR has been unable to reach an agreement to acquire the necessary property rights through either negotiation or attempted negotiation. DWR desires to initiate eminent domain action to ensure that DWR meets its geotechnical schedule.
