

**Update on Status of Resolutions of Necessity and Eminent Domain in Support of the Bay  
Delta Conservation Plan**

**Background**

The California Water Commission adopted 38 resolutions of necessity (RONs) between November 2011 and March 2012. The RONs allowed Department of Water Resources (DWR) to seek access to the properties for geotechnical investigations in support of the Bay Delta Conservation Plan through the use of eminent domain. DWR attorneys will brief the Commission on the status of the RONs and the related eminent domain cases in San Joaquin, Sacramento and Contra Costa counties.
