

**Action Item: Approval of Revised Commission Procedures for Resolutions of Necessity
and Eminent Domain**

Background

In August 2011, the California Water Commission adopted Procedures for Resolutions of Necessity. The Commission's Legal Counsel recommends revisions to the existing procedures to include two additional findings which are necessary in the event a property (or recorded interest in a property) that is the subject of a resolution of necessity has already been appropriated for public use. At the meeting, Counsel will present the proposed changes.
