

**Update on the Status of Previously Approved Resolutions of Necessity in Support  
of the Bay Delta Conservation Plan**

In November 2011, and January, February, and March 2012, the California Water Commission approved Resolutions of Necessity authorizing the State of California to acquire property for geotechnical explorations in support of the proposed Bay Delta Conservation Plan and the proposed Delta Habitat Conservation and Conveyance Program.

Subsequently, DWR amended its complaints to name additional holders of recorded interests in the property and, in March 2013, the Commission considered amendments to these Resolutions of Necessity. No final action was taken at that time.

DWR has continued efforts to optimize the alignment of proposed Delta conveyance facilities and other related projects, and to work with landowners, interest holders, and their counsel to resolve their issues and concerns.

DWR program and legal staff will update the Commission on the status of these issues.
