

Briefing and Overview of DWR's Water Transfers Program

Background

In November 2013, DWR Deputy Director Gary Bardini and Ellen Hanak, Senior Fellow at the Public Policy Institute of California, presented information on water transfers in California. At the time, the Commission expressed interest in serving as a public forum for discussion on the state's water transfer programs. In May, Governor Brown issued Executive Order B-21-13 to expedite the review and processing of voluntary transfers of water and water rights. At this meeting, DWR program staff will provide additional background information on DWR's water transfers programs, current activities, and how water conditions are impacting the water transfers market.

Maureen Sergent from the State Water Project Analysis Office, Tom Filler from the Water Transfers Office, and Maureen King with the Office of Legal Counsel will make the presentation.
