

Update on State Water Project Issues

Background

California Water Code §165 requires the California Water Commission to conduct an annual review of the progress of the construction and operation of the State Water Resources Development System and make a report on its findings to the department and the Legislature, together with whatever recommendations its deems appropriate.

At this meeting, Carl Torgersen, Department of Water Resources Deputy Director for the State Water Project (SWP), will brief the Commission on some of the key activities of the SWP including major construction projects, operation and maintenance, water supply and drought impacts, and administrative issues. Mr. Torgersen will also provide an overview of the Commission's tour of several facilities of the East Branch Extension of the SWP in Southern California which is scheduled for September 17, 2014.
