

Briefing by ACWA on Water Storage Policy Task Force

The Association of California Water Agencies (ACWA) was a strong proponent of Proposition 1 and, following its passage, convened a Task Force to provide recommendations for State actions and investments in water storage projects, and implementation of the Water Storage Investment Program. CWC Executive Officer Sue Sims attended the Task Force's first meeting in November.

At this meeting, ACWA Executive Director Tim Quinn will update the Commission on the Water Policy Task Force's activities and process for making recommendations to the Commission.
