

Discussion of Establishment of Ad Hoc Advisory Committees

Background

At its February 18 meeting, the Commission discussed the formation of Ad Hoc Advisory Committees. The Commission was supportive of the idea and suggested that Committees be formed as they are needed. Committees would consist of two members and would not have any decision making authority. At this meeting the Commission will discuss what Committees are needed and who will participate in each committee. Potential Committees include:

- Groundwater (Established)
- Administration/Budget (Established)
- Personnel
- Legal
- Water Storage Investment Program: Methods for Quantifying Public Benefits
- Water Storage Investment Program: Project Evaluation Process
