---

Our assemblyman, James Gallagher is: “Continuing the fight for water storage” (A-D Feb. 26). He thinks that we voters have ‘selective amnesia’ and will forget that \$2.7B (of Prop 1 Water Bond) was designated for above-ground water storage, namely the Sites Reservoir.

He rhetorically states the Sites Reservoir will give us ‘...greater water security for future droughts.’ He does not explain that the Sites Reservoir has no watershed and will receive all of its water from the Sacramento River.

No, we will not forget. And, as he suggested, we will remember to inform the CA Water Commission of our thoughts.
