

To: [California Water Commission](#)
Subject: Water Storage and Reservoirs
Date: Friday, March 06, 2015 7:07:08 AM

Dear Commissioners,

I am a northern California resident and voted for Proposition 1 which was explained by the state in their voters brochure for water storage and conservation. Reading reports in newspapers I am now seeing the commission saying they would like further studies before moving forward with allocating funds for the purposes of this proposition. The Site's Reservoir has been under study and enviromental review for over 3 decades and feel the time is now to invest in this project which will provide needed waters to the public, farmers, and recreational users. California is in a drought and needs to move now to allow capture more water as it moves out of the area to the ocean.

Representative Gallagher has presented legislation to fast track this project and feel it is in the interest of all citizens of California to start on this sooner rather than later.

Regards,
Bob [Redacted]
Chico, CA
