

Technical Reference Document – Working Outline

Table of Contents

Executive Summary

Acronyms and Abbreviations

1.0 Introduction

- 1.1 Background
- 1.2 Common Attributes of Any Application
- 1.3 Important Considerations
 - 1.3.1 Disclosure and Documentation
 - 1.3.2 Quality of Information Provided

2.0 General Description of Methods and Metrics

- 2.1 Methods
 - 2.1.1 Future Conditions
 - 2.1.2 Planning Horizon
 - 2.1.3 Benefit and Cost Trends
- 2.2 Metrics

3.0 Defining the Without-Project Future Conditions

- 3.1 Background
- 3.2 Study Area
- 3.3 CEQA Considerations
- 3.4 Water Resources System/Operations
 - 3.4.1 Delta Operations
 - 3.4.2 SWP/CVP Operations
 - 3.4.3 Future Hydrology with Climate Change
- 3.5 Socioeconomic Conditions
 - 3.5.1 Future Population
 - 3.5.2 Future Land Use
 - 3.5.3 Future M&I Water Demands
- 3.6 Ecosystem Conditions
- 3.7 Water Quality Conditions
- 3.8 Flood Risk
- 3.9 Emergency Response
- 3.10 Recreation
- 3.11 Sensitivity Analysis (Characteristics not included in the without-project conditions)

4.0 Defining the With-Project Future Conditions

- 4.1 Background
- 4.2 Project Formulation
- 4.3 Describing the Project
 - 4.3.1 Facilities
 - 4.3.2 Operations

- 4.4 Other Modifications
- 5.0 Calculating Physical Changes**
 - 5.1 Background
 - 5.2 General Project Analysis
 - 5.2.1 Projected Conditions
 - 5.2.2 Long-term Planning Analysis
 - 5.2.3 Integration of Different Types and Methods of Analyses
 - 5.2.4 Comparability of With-Project Condition
 - 5.3 Metrics
 - 5.3.1 Parameters, Reporting Units, and Locations
 - 5.3.2 Summary Statistics
 - 5.3.3 Full Accounting
 - 5.4 Surface and Groundwater Operations Analysis
 - 5.4.1 Background
 - 5.4.2 Operations Analysis Components
 - 5.4.3 Surface Water Methods
 - 5.4.4 Groundwater Methods
 - 5.4.5 Data Sources
 - 5.4.6 Metrics
 - 5.5 Riverine and Delta Hydrologic/Hydraulic Analysis
 - 5.5.1 Background
 - 5.5.2 H&H Analysis Components
 - 5.5.3 Riverine Methods
 - 5.5.4 Delta Methods
 - 5.5.5 Data Sources
 - 5.5.6 Metrics
 - 5.6 Surface Water and Groundwater Quality Analysis
 - 5.6.1 Background
 - 5.6.2 Water Quality Analysis Components
 - 5.6.3 Surface Water Quality Methods
 - 5.6.4 Groundwater Quality Methods
 - 5.6.5 Data Sources
 - 5.6.6 Metrics
 - 5.7 Aquatic and Terrestrial Biological Resources Analysis
 - 5.7.1 Background
 - 5.7.2 Biological Resources Analysis Components
 - 5.7.3 Methods
 - 5.7.4 Data Sources
 - 5.7.5 Metrics
 - 5.8 Flood Risk Reduction Analysis
 - 5.8.1 Background
 - 5.8.2 Components

- 5.8.3 Methods
- 5.8.4 Data Sources
- 5.8.5 Metrics
- 5.9 Emergency Response Analysis
 - 5.9.1 Background
 - 5.9.2 Components
 - 5.9.3 Methods
 - 5.9.4 Data Sources
 - 5.9.5 Metrics
- 5.10 Recreation Analysis
 - 5.10.1 Background
 - 5.10.2 Components
 - 5.10.3 Methods
 - 5.10.4 Data Sources
 - 5.10.5 Metrics
- 5.11 Hydropower and Energy Resources Analysis
 - 5.11.1 Background
 - 5.11.2 Components
 - 5.11.3 Methods
 - 5.11.4 Data Sources
 - 5.11.5 Metrics
- 6.0 Monetizing the Value of Project Benefits**
 - 6.1 Background
 - 6.1.1 What is a benefit?
 - 6.2 Assumptions
 - 6.2.1 Planning Horizon
 - 6.2.2 California Accounting Perspective
 - 6.2.3 Analysis in Real Dollars
 - 6.2.4 Constant Dollar Year
 - 6.2.5 Discount Rate
 - 6.2.6 Price Indices
 - 6.2.7 Real Energy Prices
 - 6.2.8 Future Conditions and Trending Economic Benefits
 - 6.3 Methods
 - 6.3.1 Recommended Steps
 - 6.3.2 Method Options
 - 6.3.3 Use of Unit Values
 - 6.3.4 Avoiding Double Counting
 - 6.4 Tools and Methods for the Public Benefits
 - 6.4.1 Ecosystem
 - 6.4.2 Water Quality
 - 6.4.3 Flood Damage Reduction

	6.4.4	Emergency Response
	6.4.5	Recreation
7.0		Estimating the Project Costs
	7.1	Background
	7.1.1	Cost Estimating
	7.1.2	Levels of Cost Estimates
	7.2	Assumptions
8.0		Comparing Benefits to Costs
	8.1	Background
	8.2	Assumptions
	8.3	Tools and Methods
	8.4	Metrics
9.0		Allocating Costs to Beneficiaries
	9.1	Background
	9.2	Assumptions
	9.3	Tools and Methods
	9.4	Metrics
10.0		Determining Costs Effectiveness
	10.1	Background
	10.2	Assumptions
	10.3	Tools and Methods
	10.4	Metrics
11.0		Evaluating Sources of Uncertainty
	11.1	Background
	11.2	Climate Change and Sea Level Rise
	11.3	Other Water Management Actions
12.0		Glossary
13.0		References

Attachments

1. Guidance Documents for Benefit-Cost Analysis
2. Unit Values for Water
3. Methods, Data, and Sources for Monetizing Ecosystem Benefits
4. Models for Evaluating Public Benefit
