

Update on DWR's Implementation of SB83 and the Online System for Well Completion Reports (OSWCR)

Background

DWR has collected well completion reports since the 1949. In June 2015, Senate Bill (SB) 83 made all well completion reports available to the public upon request. Previous law prohibited the release of these reports. Prior to the passage of SB 83, DWR began implementation of the Online System for Well Completion Reports (OSWCR), a system that allows drillers to submit their well completion reports online, replacing the former method of mailing in paper forms. Eric Senter, Department of Water Resources' Senior Engineering Geologist, will update the Commission on the DWR's current efforts related to well completion reports.
