

Next Steps on Development of Draft WSIP Regulations
--

Background

The California Water Commission is developing the Water Storage Investment Program (WSIP) and regulations for the quantification and management of the public benefits of water storage projects in order to implement Chapter 8 of Proposition 1. The initial draft WSIP Quantification Regulations were released for public comment in January 2016. Since that time, staff has developed proposed updates to the draft regulations based on public and Commission input, and additional staff work.

Staff will summarize outstanding issues and proposed changes to the draft regulations presented during this meeting. Following the Commission deliberation and discussion, the Commission chair will provide direction on incorporating the staff recommendations into the draft WSIP Quantification Regulations. Direction will be provided on the following topics: 1) early funding for environmental documentation and permitting, and 2) evaluation criteria.
