Subject: Please build more dams!
Date: Saturday, February 06, 2016 4:26:39 PM

I am writing to request that the California Water Commission make building more dams one of the highest priorities in new spending. It is incredible that, through all these years of drought, we have not built any dams to increase our water storage. Now, water is running off the mountains and back to the ocean while we struggle with increased population and water shortages.

Please work to overcome and bypass any resistance from groups that are fighting against dams. We all know they will try to find an endangered frog or tree to stop any dams. But dams provide not only water, but great recreation areas and a place for abundance of new wildlife.

Thanks,

Don Williams
