

Discussion of 2017 State Water Project Review
--

Background

Water Code section 165 requires the California Water Commission to conduct an annual review of the construction and operation of the State Water Project (SWP) and to report its findings and recommendations to the Director of the Department of Water Resources (DWR) and the State Legislature.

In January, Commission staff presented a proposed outline for the 2017 review. At this meeting, staff will present a draft review for Commission discussion and direction on findings and recommendations. At the Commission's March meeting, staff will present a draft report that will reflect the Commission's direction.

This is an informational item.
